Accessory code

198D: Cover base for power supply - with lux/motion sensor for Casambi - with power and pendant cable and swivel joint - for 35-60-100 W

Technical description

Specific cover base for 35-60-100 W power supply and control plates fitted with a Libera element with a lux and motion sensor for Casambi systems. A swivel joint with an end cap and pass-through cabling is connected to the Libera element with a sensor. This allows open and closed polygonal compositions to be created. Complete with power and pendant cables L=3000 mm and a millimetric cable adjustment system. To be completed with a power supply plate, to be ordered separately.

Installation

For the correct positioning of the base that determines the position of the sensor, refer to the instruction sheets or contact iGuzzini.

Colour

White (01) | Black (04) | Black/Brass (57) | Titanium (N8) | Sapphire blue (N9) | Titanium/Brass (Q3) | Sapphire blue/Brass (Q4) | White/Brass (U8)

Notes

This code is only compatible with the power supply plate for the 35-60-100 W Casambi system sensor, for other power plates (150 W) an appropriate base is available.

The motion and/or daylight control function must be programmed using the Casambi app.

This code is not compatible with the power supply plate for the 150 W Casambi system sensor.

Complies with EN60598-1 and pertinent regulations

IP20
