Accessory code

SQ69: Pendant base with Libera module and lux/motion sensor for Casambi - for start or end position

Technical description

Pendant base for Libera System with module complete with lux/motion sensor for Casambi systems. The Libera element with the sensor is fitted with an end cap at one end. This article allows the sensor to be mounted at the start or end of continuous line system compositions. This article allows Libera compositions to be powered if remote power supplies are used. Power and pendant cable L=3000

Installation

For the correct positioning of the base that determines the position of the sensor, refer to the instruction sheets or contact iGuzzini.

Colour

White (01) | Black (04) | White/Gold (41) | Black/Brass (57) | Titanium (N8) | Sapphire blue (N9) | Titanium/Brass (Q3) | Sapphire blue/Brass (Q4)

Wiring

L/N/E terminals for the power supply to the Casambi module in the base (used only as a start or end lux/motion sensor).

L/N/E/DA/DA/+48V/-48V DALI-2 line terminals and power supply in base (used both as a start or end lux/motion sensor and a power supply point).

Notes

For the motion and/or daylight control function, the sensor must be programmed using the Casambi app.

Complies with EN60598-1 and pertinent regulations

IP20

Technical data

Control:	Casambi sensor
