

Intermediate arm - L=121mm for wall or ceiling installation in a continuous line for heights lower than 3m

Last information update: July 2024

Accessory code

X749: Intermediate arm - L=121mm for wall or ceiling installation in a continuous line for heights lower than 3m

Technical description

AISI 304 stainless steel arm L=121mm and 4mm thick for installing two products in a continuous line. These arms are suitable for installation at heights lower than 3m. The arm is fitted with M6 captive screws and is installed easily with a bayonet coupling. The code includes a retaining cable that simplifies installation.

Colour	Weight (Kg)
