

**Outer casing for floor, ground, wall and ceiling installation L=350mm long; for Recessed versions of Linealuce 27 Full Remote L=356mm long.**

Last information update: June 2025

**Accessory code**

XA58: Outer casing for floor, ground, wall and ceiling installation L=350mm long; for Recessed versions of Linealuce 27 Full Remote L=356mm long.

**Technical description**

Aluminium outer casing L=350mm long, complete with technopolymer side and upper caps and membrane cable glands. The side caps are fitted with openable circular walls that make it easier to insert corrugated tubes in the cable glands through which the power cables are passed. To be used with the Recessed version of the Linealuce 27 Full Remote luminaire L=356mm long.

**Installation**

The outer casing can be recessed in the ground, floors, walls and ceilings. Floor or wall installations require cast cement/concrete or other suitable material. For floor installations a drainage channel must be constructed or gravel inserted for drainage under the outer casing before installation, to guarantee the required IP protection rating. For ceiling installations with plasterboard panels (1-30 mm thick), make the preparation openings as indicated in the instructions sheet and use the steel cables with reinforcement plates in the accessory kit.

**Colour**  
Indeterminate (00)

**Weight (Kg)**  
0.3

Complies with EN60598-1 and pertinent regulations
