Accessory code

6173: Aluminium flange for installation on poles ø 120 mm - for 1 projector

Technical description

Flange made of forged steel painted with textured liquid surface treatment. The flange can be installed on any pole with diameter ø120mm, without drilling to mechanically secure it. Allows complete rotation of the Maxiwoody floodlight in any direction, thanks to the combination of rotations between floodlight and bracket (continuous) and rotations between bracket and flange (360°). Installation is guaranteed by stainless steel screws and nuts. There are hexagonal nut anti-rotation slots in the flange.

Installation

On a cylindrical pole ø120mm using four M8x45 mm screws and four locknuts, all made of stainless steel

Colour

Grey (15)

Weight (Kg)

4,54

Wiring

The power cable exits the pole through a cable gland with hole d=15mm

Complies with EN60598-1 and pertinent regulations

960°C
