**Accessory code**

PD97: Power base with pendant cables - surface-mounted version - for body Ø114

Technical description

Pendant/Power supply base for structure - surface-mounted version. Ceiling-mounted shaped steel fixing plate - polycarbonate cover rose. The cables supplied - L 2500 mm - simultaneously perform both pendant and power supply functions - length and wiring adjustments are made in the upper section of the lighting body that is equipped with a connection terminal block and safety cable clamps. Sliding devices positioned on the length of the cables, allow the aesthetics of the pendant set up to be customised. Integrated DALI dimmable power supply unit.

Installation

steel plate for fixing to installation surface with screws and screw anchors (not included)

Colour

White (01) | Black (04)

Weight (Kg)

0.35

Wiring

connection to mains network made with a quick-coupling terminal block positioned on the base plate - pendant/power supply cable adjustments and successive wiring to be performed on the upper section of the lighting body, which includes a connection terminal block and safety cable clamps.

Complies with EN60598-1 and pertinent regulations

IP40
