Accessory code

PB51: Anti-tilting suspension kit

Technical description

Bracket with pendant cables specifically designed to stop the Superrail LV track tipping or turning in serial projector layout situations. The 2 steel cables and manual regulators in the kit allow any track composition with excessive side weight problems to be balanced easily and effectively. Cast zamak balancing levers and details. A millimetric adjustment device is positioned on the track.

Colour

White (01) | Black (04)

Weight (Kg)

0.09

Mounting

ceiling pendant

Complies with EN60598-1 and pertinent regulations
