Last information update: May 2023

Accessory code

MZ99: Ball joint - geared for power supply

Technical description

Articulated joint for low voltage track designed to receive a 2P power cable. The special articulated joint system allows the direction to be changed between two consecutive tracks even with angles other than 90°. Electrical and mechanical connection. This accessory allows square or quadrangular compositions to be installed with surface-mounted and pendant fixtures.

Installation

Mechanical connection on track.
