Last information update: December 2020

### Accessory code

1278: Conical pole with plate H 4000mm D 100-60mm

### Technical description

Conical pole with plate made of EN 10025-S235JR 70 micron hot galvanized steel as per UNI EN ISO 1461 (EN 40-5) standards. Acrylic powders-coating paint surface finish. The pole has a conical cross-section with upper diameter of 60 mm and it's 3 mm thick.

### Installation

Fixed to the ground by M18x330mm bars.

### Colour

Grey (15)

### Weight (Kg)

39

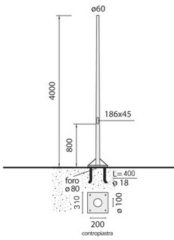

### Wiring

The inspection opening (186x45 mm) is closed by a die-cast aluminium lid and is located at 800 mm from the ground. The power supply cable enters the pole through a 150x50 mm slot located on the pole at 100 mm from the base. The earthing connection for the pole is made through a tropicalised steel placed insert into the d=11 mm hole located at 700 mm from the end of the pole.

### Notes

Class II when used with appropriate connections.

Complies with EN60598-1 and pertinent regulations
