**Product code**MXR4: Minimal recessed profile for Ledstrip 6 mm - 90° external angle - L=3000 **Attention! Code no longer in production****Technical description**

Rigid aluminium profile designed for fully recessed installation. The profile is specifically designed for applying a 6 mm strip with a milky elastomer protective cover and allows you to finish external angles (90°) on walls or ceilings with ultraslim luminous lines that are slightly set back in order to emphasize the light blade. Can be applied to existing walls or twin plasterboard panels. The profile should be plastered and painted to ensure the edge blends in with the surface it is installed on. Accessory end caps with separate code.

**Installation**

Profile is fixed to the plasterboard panels (12.5 mm thick) using screws (not included). The profile should be filled and painted to ensure the edge blends in with the surface it is installed on. For alternative installation systems and procedures, read the 6 mm Ledstrip instructions sheet carefully.

**Colour**

White (01)

**Weight (Kg)**

0.76

**Mounting**

external wall corner|wall recessed|ceiling recessed|wall surface|ceiling surface

**Notes**
