**Product code**

X687: Organic Response IR Dongle for programming with Portal

---

**Technical description**

The Organic Response dongle is an IR transceiver required in the commissioning phase for connecting the multi-sensors to the Organic Response Portal.

Thanks to the directionality of IR communication, it will be easy to identify sensors/luminaires safely and precisely and therefore to map them more rapidly on the system loaded in the Organic Response Portal.

---

**Installation**

It is inserted in a Smart iOS or Android device via the 3.5 mm jack.

Operates with the "Organic Response" app available from App Store and Play Store.

The dongle is supplied with a recharge connector that is inserted in a USB A socket. Recharging is indicated by a blue flashing LED that turns off when recharging is complete.

Typical battery duration: 4 days (in relation to use).

Charge time: 30 minutes.

Charge lasts: 90 days (according to battery state).

---

**Colour**

Indeterminate (00)

**Weight (Kg)**

0.01

---

**Notes**

For devices like smartphones/tablets without a 3.5mm earphone socket (or a micro/earphone), specific adapters are available on the market and must be purchased separately (e.g. jack-USB C socket adapters or jack-Lightning socket).

Complies with EN60598-1 and pertinent regulations

---

**IP20**
